Summary

Engineering student with industry experience building data-driven applications for visual inspection, document analysis, and process automation. Skilled in PyTorch, YOLOv11, Flask, MongoDB, LangChain, Roboflow, and n8n. Contributed to large-scale systems handling 10,000+ records while achieving up to 99% prediction accuracy. Strong background in predictive modeling, feature extraction, backend integration, distributed services, and end-to-end deployment of scalable solutions and also OOPs concepts.

Technical Skills

Languages & Databases: Python, HTML, CSS, JavaScript, R, SQL, MongoDB

Frameworks & Libraries: PyTorch, Scikit-learn, Pandas, NumPy, OpenCV, Flask, YOLOv11, LangChain

AI & ML: Deep Learning, Computer Vision, NLP, TensorFlow, Transformers, OCR, LLMs, RAG, Prompt Engineering, AI Agents, MCP, n8n

Tools & Platforms: Git, GitHub, Linux, Ubuntu, Roboflow, Google colab, Postman, Conda, GCP, VS Code, Kaggle, Docker, R Studio

Experience

Droom Technology Pvt. Ltd.

Gurugram, India

AI/ML Engineering Intern

Dec 2025 – June 2026

- Integrated deep learning-based computer vision models for **vehicle detection and classification** on a GPU-accelerated Ubuntu environment, achieving up to **99% accuracy**.
- Trained and optimized **Ultralytics YOLOv11** models for **real-time object detection**, achieving **99% accuracy** across diverse vehicle categories and operating conditions.
- Performed data mining, cleaning, and preprocessing of **10,000+ data records**; utilized **Roboflow** for efficient dataset annotation and developed reproducible preprocessing pipelines for reliable model training.
- Containerized and orchestrated **150–200 services**, including **n8n, Redis, RabbitMQ, and PostgreSQL**, using **Docker** to enable scalable, portable, and automated microservices deployment.
- Created n8n automation workflows integrating MCP with the **MIRA AI** voice agent powered by **ElevenLabs**, leveraging API integrations and event-driven architecture to automate vehicle history order processing and management.
- Managed version control and tracked **50+ machine learning experiments** using Git and GitHub, improving collaboration across **3+ AI projects** and ensuring reproducibility.

Projects

MIRA AI Voice Agent | *n8n, MCP, ElevenLabs, REST APIs* | [Droom Technology](#)

Dec 2025 – June 2026

- Designed and built **n8n automation workflows** integrating **MCP** with the **MIRA AI** voice agent, powered by **ElevenLabs** for real-time speech synthesis.
- Implemented **event-driven architecture** and API integrations to automate end-to-end vehicle history order processing and management, reducing manual handling of client requests.
- Containerized and orchestrated supporting services using **Docker** to enable reliable, scalable operation of the voice agent pipeline.

AI Research Assistant | *Python, LangChain, ChromaDB, OpenAI, FastAPI* | [GitHub](#)

May 2026 – Jun 2026

- Built a Retrieval-Augmented Generation (RAG) assistant over **1,000+ technical documents** using LangChain and ChromaDB.
- Reduced information retrieval time by **80%** through semantic search and vector embeddings.
- Implemented conversational memory and citation-aware responses, serving **500+ user queries**.
- Exposed REST APIs through FastAPI for scalable integration with external applications.

Voice Assistant AI | *Personal Python Project* | [GitHub](#)

Jul 2025 – Oct 2025

- Developed a hands-free AI voice assistant using Python for browsing news, music, and chat via voice commands.
- Integrated speech recognition, **gTTS**, pyttsx3, Pygame, requests for seamless **TTS/STT**.
- Connected to OpenAI API for conversations and **NewsAPI** for real-time updates.
- Added error handling, offline fallback, and context-aware prompt design for reliability.
